

# Reveal Q+

## For Fumonisin

### Intended Use

Reveal Q+ for Fumonisin is a single-step lateral flow immunochromatographic assay based on a competitive immunoassay format intended for the quantitative testing of fumonisin in corn products.

### Product Specifications

Range:	0.3–6 ppm
Testing time:	6 minutes
Storage:	Room temperature (18–30°C)
Tests per kit:	25
Approvals:	USDA-GIPSA 2012-032

### Results

A screenshot of a handheld device's testing interface. At the top, a green bar displays 'TESTING' and the time '11:01AM AUG 17 2012'. Below this, the text reads 'T014, 11:01:19 AUG 17 2012', 'Fumonisin Q+', and 'Sample ID:T014'. A small icon of a test strip is shown to the right. Further down, it says 'Fum Q+' and '&gt;7.0 ppm'. A large blue arrow icon is positioned to the right of the result.
